   - Important Events of Life Holy Prophet in Madina
   - Important Lessons Derived from the life of Holy Prophet in Madina

6. **Introduction to Sunnah**
   - Basic Concepts of Hadith
   - History of Hadith
   - Kinds of Hadith
   - Uloom-ul-Hadith
   - Sunnah & Hadith
   - Legal Position of Sunnah

7. **Selected Study from Text of Hadith**

8. **Introduction to Islamic Law & Jurisprudence**
   - Basic Concepts of Islamic Law & Jurisprudence
   - History & Importance of Islamic Law & Jurisprudence
   - Sources of Islamic Law & Jurisprudence
   - Nature of Differences in Islamic Law
   - Islam and Sectarianism

9. **Islamic Culture & Civilization**
   - Basic Concepts of Islamic Culture & Civilization
   - Historical Development of Islamic Culture & Civilization
   - Characteristics of Islamic Culture & Civilization
   - Islamic Culture & Civilization and Contemporary Issues

10. **Islam & Science**
    - Basic Concepts of Islam & Science
    - Contributions of Muslims in the Development of Science
    - Quranic & Science

11. **Islamic Economic System**
• Basic Concepts of Islamic Economic System
• Means of Distribution of wealth in Islamic Economics
• Islamic Concept of Riba
• Islamic Ways of Trade & Commerce

12. Political System of Islam
• Basic Concepts of Islamic Political System
• Islamic Concept of Sovereignty
• Basic Institutions of Govt. in Islam

13. Islamic History
• Period of Khilaf-E-Rashida
• Period of Ummayyads
• Period of Abbasids

14. Social System of Islam
• Basic Concepts of Social System of Islam
• Elements of Family
• Ethical Values of Islam

Recommended books:
• Hassan, H-H. An Introduction to the Study of Islamic Law. Islamabad, Pakistan: Leaf Publication

BASICS OF MATHEMATICS

Course Code: PSY-307 Credit Hours: 03

Objectives:
To give the basic knowledge of Mathematics and prepare the students not majoring in mathematics
• Understand the use of the essential tools of basic mathematics;
• Apply the concepts and the techniques in their respective disciplines;
• Model the effects non-isothermal problems through different domains;

Course Outline:

1. Algebra: Preliminaries:
   • Real and complex numbers.
• Introduction to sets.
• Set operations, functions, types of functions.

2. Matrices:
• Introduction to matrices.
• Types of matrices.
• Inverse of matrices.
• Determinants.
• System of linear equations.
• Cramer’s rule.

3. Quadratic equations:
• Solution of quadratic equations.
• Nature of roots of quadratic equations.
• Equations reducible to quadratic equations.

4. Sequence and Series:
• Arithmetic.
• Geometric progression.
• Harmonic progressions.

5. Permutation and combinations:
Introduction to permutation and combinations.

6. Binomial Theorem:
Introduction to binomial theorem.

7. Trigonometry:
• Fundamentals of trigonometry.
• Trigonometric identities.

8. Graphs:
• Graph of straight line.
• Circle and trigonometric functions.

9. Statistics: Introduction:
• Meaning and definition of statistics.
• Relationship of statistics with social science.
• Characteristics of statistics, limitations of statistics and main division of statistics.

10. Frequency distribution:
• Organization of Data.
• Array, Ungrouped and Grouped Data.
• Types of Frequency Series, Individual, Discrete And Continuous Series.
• Tally Sheet Method.
• Graphic Presentation of the Frequency Distribution, Bar Frequency Diagram Histogram, Frequency Polygon, Cumulative frequency curve.

11. Measures of central tendency:
• Mean, medium and modes, quartiles, deciles and percentiles.

12. Measures of dispersion:
• Range, inter quartile deviation mean deviation, standard deviation, variance, moments, skewness and kurtosis.
Recommended books:
- Wilcox, R. R., ‘Statistics for The Social Sciences’,

INTRODUCTION TO STATISTICS

Course Code: PSY-308
Credit Hours: 03

Objectives:

Research and policy making is one of the objective of the academic institution and particularly of HEIs. The importance of statistical application in all almost all the disciplines of natural and social sciences in one of the compulsory aspect because research without statistic is not possible. Keeping the importance of statistics, the course has been introduce in Psychology with the objectives that the students of Psychology shall adopt various techniques of data collection, interpretation, report writing and testing of hypothesis in practical manner to produce quality research. The course has been designed in such a way that the students shall took interest in learning of the statistical tools and further enhance their capacity for implementation with the ethical guidelines of the research.

1. Introduction
   - Introduction, meaning and definitions of statistics
   - Descriptive and inferential statistics
   - Population parameter and sample statistics
   - Variable and its types
   - Use of statistics in modern Psychology

2. Classification of data
   - Levels of measurement
   - Types and sources of data
   - Classification, its types, bases
   - Aims of classification
   - Frequency distribution
   - Class-limits
   - Class boundaries
• Class-marks
• Class width
• Construction of a group frequency distribution
• Cumulative frequency distribution

3. Measures of central tendency

• Average, introduction and meaning
• Criteria of a satisfactory average
• Arithmetic mean
• Median
• Mode
• Quartiles, Deciles and percentiles

4. Measures of dispersion

• Introduction and definitions of dispersion
• Types of dispersion
• Range
• Mean deviation
• Variance
• Quartile Deviations
• Standard deviation
• Coefficient of variation

5. Correlation and regression

• Introduction, meaning and definition of correlation
• Types of correlation
• Pearson product moment or coefficient of correlation
• Introduction and types of regression
• Deterministic and probabilistic relation or model
• Least square regression equation Y on X and X on Y

6. The logic and types of sampling

• Population, target population, census method
• Sampling, sample, sampling frame, sampling bias
• Types of sampling
• Probability sampling
• Non Probability sampling
• Sampling and non-sampling errors
• Principles of sampling

Recommended books:

COMPUTER APPLICATIONS

Course Code: PSY-309

Credit Hours: 03

Course objectives
This course is designed in view of the application of computers in wide range of areas. This course would familiarize students with basics of computers. It further aims to educate the students about the tremendous potential of computer as an instrument for research work in a variety of disciplines. It will cover brief introduction to computer hardware and software related to discipline of psychology. After having completed this course, students will be able to use windows software such as MS Office including MS Excel, MS Word & MS Power Point.

Course Contents

1. Introduction to Computer Sciences
   History of computer development; Uses and limitations; Basic units of Personal computers (PC)
2. Introduction to Window
   Basic features of windows as operating system starting up; Windows desktop; Using applications; Managing files and folders; Managing the desktop; Change settings
3. Introduction to MS word
   Basic features of M/S Word Menu bar and tool bars; Typing, editing formatting text; Opening, saving and closing documents; Printing, copy and paste; Making tables and graphs; Numbering; Bordering the tables
4. Introduction to MS Excel
   Basic features; Introduction to spreadsheet; Menu bar and formula bar; Manipulating data in rows; columns and all entries; Applying formula Creating and formatting charts; Designing a table; Auto file and advance filter; Printing features
5. Introduction to Power Point
   Methods to deliver a presentation; Preparing slides /presentation; Blank presentation; Using templates for presentation; Color scheme; Animation scheme; Data formatting; Viewing an slide
show; Adding clip art to slide, insigne a should or, video file, adding animations to slides; Printing in power point.

**Recommended books:**

*Note:* **General Courses from other Departments**
Details of courses may be developed by the concerned universities according to their Selection of Courses as recommended by their Board of Studies.

---

**DETAILS OF FOUNDATION COURSES**

**INTRODUCTION TO PSYCHOLOGY**

**Course Code:** PSY-401  
**Credit Hours:** 03

**Course Objectives**
This course will help to describe Psychology with major areas in the field, and identify the parameters of this discipline. It will help to distinguish between the major perspectives on human thought and behavior. It helps to gain insight into human behavior and into one's own personality or personal relationships. Explore the ways that psychological theories are used to describe, understand, predict, and control or modify behavior.

**Course Contents**

1. **Introduction to Psychology**
   - Introduction, Meaning and definition of Psychology
   - Nature and Scope of Psychology
   - History of Psychology
   - Different Schools in Psychology
   - Application of Psychology with special reference to Pakistan

2. **Methods of Psychology**
   - Observation
   - Case History Method
   - Experimental Method
   - Survey Method
3. Biological Basis of Behavior
   - Neuron: Structure and Functions
   - Central Nervous System and Peripheral Nervous System
   - Endocrine Glands

4. Sensation, Perception and Attention
   - Sensations: Characteristics and Major Functions of Different Sensations
   - Vision: Structure and functions of the Eye.
   - Audition: Structure and functions of the Ear.
   - Perceptions: Nature of Perception
   - Factors of Perception: Subjective, Objective and Social
   - Kinds of Perception:
     - Spatial Perception (Perception of Depth and Distance)
     - Temporal Perception; Auditory Perception.
   - Attention: Factors, Subjective and Objective
     - Span of Attention
     - Fluctuation of Attention
     - Distraction of Attention (Causes and Control)

5. Motives
   - Definition and Nature
   - Classification of Motives (Primary (Biogenic) Motives: Hunger, Thirst, Defecation and Urination, Fatigue, Sleep, Pain, Temperature, Regulation, Maternal Behavior, Sex, Secondary (Sociogenic) Motives: Play and Manipulation, Exploration and Curiosity, Affiliation, Achievement and Power, Competition, Cooperation, Social Approval and Self Actualization)

6. Emotions
   - Definition and Nature
   - Physiological changes during Emotions (Neural, Cardial, Visceral, Glandular), Galvanic Skin Response; Pupillometrics
   - Theories of Emotion (James Lange Theory; Cannon-Bard Theory, Schachter –Singer Theory)

7. Learning
   - Definition of Learning
   - Types of Learning: Classical and Operant Conditioning: Trial and Error, Learning by Insight; Observational Learning, Methods of Learning

8. Memory
   - Definition and Nature
   - Memory Processes: Retention, Recall and Recognition
   - Forgetting: Nature and Causes

9. Thinking
   - Definition and Nature
   - Tools of Thinking: Imagery; Language; Concepts
10. Individual differences
- Definition of Individual Differences and conceptual Framework
- Intelligence, personality, aptitude, achievement

Recommended books:

CONTEMPORARY HISTORY OF PSYCHOLOGY

Course Code: PSY-402 Credit Hours: 03

Course Objectives
The course aims at the development of basic understanding of the various processes of scientific development and change and to become familiar with the chronological history of ideas which contribute to the field of Psychology. So, the brief historical context within which that historical development took place and the schools of psychology, are well explained and understood. It will enable current psychological thought within that historical development and context.

Course Contents
1. Introduction
- Brief History of Psychology
- Early Greek, Roman philosophy and Philosophers. (Thales, Anaximander, Heraclitus, Parmenides, Pythagoras, Empedocles)
- Early Greek Medicine
- The relativity of Truth; Protagoras, Gorgias, Xenophobes, Socrates, Plato, Aristotle
- Skepticism & Cynicism
- Epicureanism and Stoicism, Neoplatonism and Emphasis on spirit Contribution of Muslim Philosophers
- Scholasticism

2. The Beginning of Modern Science and Philosophy
- Renaissance and the rise of Humanism; Challenges to Church authority; Rene Descartes
- British Empiricism; French Sensationalism; Positivism
- Rationalism
- Spinoza; Immanuel Kant; Johann Friedrich Herbert; Friedrich Hegel
- Romanticism and Existentialism
- Early developments in physiology and the rise of experimental psychology; Individual differences; Early Research on brain functioning, Voluntarism, Structuralism and other early approaches to psychology Voluntarism.

3. Psychobiology
   Karl and Lashley; New connectionism; Behavioral genetics
- Contemporary Psychology
- The Diversity in contemporary psychology
- The tension between pure, scientific and applied psychology

4. Psychology's status as a science; Post modernism

Recommended books:

SCHOOLS OF PSYCHOLOGY

Course Code: PSY-403 Credit Hours: 03

Course Objectives
The course will develop a basic understanding of the various processes of scientific development and change, It will assist in becoming familiar with the chronological history of ideas which contribute to the field of psychology. The historical context within which that historical development took place and the schools of psychology, are explained in brief.
Course Contents

1. Roots of Psychology Philosophical roots:
   - Greek and Muslim contribution to the development of psychology.
   - The spread of scientific psychology. Psychology in Europe, USA, and Former Soviet Union

2. Systems and Schools of Thought:
   - Structuralism
   - Functionalism
   - Behaviorism
   - Gestalt psychology and Field Theory
   - Psychodynamics
   - Humanistic Psychology
   - Cognitive Psychology

3. Psychology in Pakistan

4. Practicum: 25 Marks
   Following experiments shall be performed by the students: Concept Formation Maze Learning Memory: Function of Recitation Memory: Function of Time (Saving Method) Memory: Method of Serial Reproduction Problem Solving

Recommended books:

EXPERIMENTAL PSYCHOLOGY

Course Code: PSY–404 Credit Hours: 03

Course Objectives
This course will help the students to examine the importance of the Psychology of the individual to the development of self-esteem, cooperative learning, individual differences, and motivation and learning styles.

Course Contents
1. Psychophysics:
   - Importance of Psychophysics
   - Absolute & Differential Thresholds
   - Psychophysical Methods
• Theory of signal detection.

2. **Perception:**
   • Perception and Sensation.
   • The Gestalt Concept of Perception.
   • Perceptual Consistencies; Depth Perception; Figure and Ground Perception; Perception of Movement; Perceptual defense and vigilance; Perception of time.
   • Visual illusions

3. **Learning:**
   • Types of learning.
   • Basic factors in learning and performance.
   • Role of reinforcement in learning.
   • Contemporary theories of Learning

4. **Memory:**
   • Theories of Memory.
   • Compartments of Memory (The storage and retrieval process.)
   • Mnemonics: ways of improving memory (Devices Mnemonics)

5. **Thinking and Problem-Solving:**
   • Nature of Thinking
   • Concept formation
   • Set and attitude as factors in Thinking
   • Creative Thinking
   • Theories of Thinking.

6. **Practicum: 25 Marks**
   Three of the following experiments shall be performed by the students:
   • Meaningful vs. Nonsense Learning
   • Retroactive Inhibition
   • Simple Reaction Time
   • Transfer of Training
   • Trial Position Effect under Massed and Distributed Practice
   • Whole vs. Part Learning

**Recommended books:**
• Andreas, B-G. (1972). Experimental Psychology (2nd Ed). New York,USA : John Wiley and Sons

**INTRODUCTION TO SOCIAL PSYCHOLOGY**
Course Code: PSY–405

Course Objectives

Social Psychology aims to give awareness of certain fundamental concepts and principals involved in human behavior, and in his interaction with the society. It provides an awareness of the major problems and issues in the discipline of social psychology, and the capacity to interpret them through research findings. The aim is to accomplish the goal, of the understanding and interpretation of human behavior.

Course Contents:

1. **The Field of Social Psychology**
   - Introduction to social psychology
   - Conducting research in social psychology
   - Current trends and future scope

2. **Self-Presentation and Social Perception**
   - Non-verbal behavior
   - Attribution
   - Impression management

3. **Social Cognition**
   - Schemas
   - Heuristics
   - Affect and Cognition.

4. **Behavior and Attitudes**
   - Nature of attitudes
   - Formation, maintenance, and change in attitudes
   - Relationship between attitude and behavior
   - Cognition & attitude

5. **Aspects of Social Identity**
   - The self
   - Nature of the self
   - Self-concept
   - Social diversity
   - Self esteem
   - Other aspects of self-functioning
   - Self-focusing
   - Cognitive and affective aspects
   - Self-Monitoring
   - Self-Efficacy

6. **Gender & Socialization**

7. **Social Influence**
8. Pro-social Behavior
- Why do we help?
- When do we help?
- Does true altruism really exist?
- Whom do we help?
- How can we increase helping?

9. Aggression /hurting others
- What is Aggression?
- Influences on Aggression
- Reducing Aggression
- Lucifer effect
- Bullying

10. Theories of Social Psychology Theorists
- Sigmund Freud
- C.H. Cooley
- B. F. Skinner
- D H Mead

Recommended books:

PERSONALITY THEORIES-I

Course Code: PSY–406 Credit Hours: 03

Course Objectives
This course aims to examine, in depth, specific theories of Psychology, under each of the major psychological models of personality through their theoretical concepts and principles, their explanation of personality development, their assessment techniques, and their application to treatment of psychopathology. Students will be able to articulate the major concepts and principles of each personality theory discussed in the class and in the text

Course Contents
1. Psychology Of Personality
   - Introduction to the Discipline
   - Meaning of personality
   - Meaning of theory
   - Components of personality theory

2. The Psychoanalytic Legacy; Sigmund Freud
   - Basic concepts
   - Personality structure:
     - Three interacting systems
   - Personality development
   - Five sequential stages.
   - Personality dynamics
   - Instincts / anxiety / catharsis and anti-catharsis
   - Defense mechanisms
   - Application of psychoanalytic theory; Dream analysis paraphrases
   - Psychotherapy
   - Critical evaluation

3. Personality's Ancestral Foundations: Carl Jung
   - Basic concepts: Conscious and unconscious; Archetypes.
   - Personality typology
   - Personality development
   - Further applications: Dream analysis; Psychopathology.
   - Psychotherapy
   - Critical evaluation

4. Overcoming Inferiority And Striving For Superiority: Alfred Adler
   - Basic concepts:
   - Developing social feelings: society; work and love
   - Style of life; future goals vs. past events.
   - Overcoming inferiority; Striving for superiority and superiority complex.
   - Family influences on personality development
   - Further applications: Dream analysis; Psychopathology.
   - Psychotherapy
   - Critical evaluation

5. Neo Freudians -Karen Horney
   - Basic anxiety
   - Coping by way of 10 neurotic needs moving towards, or against, or away from people
   - Development of an idealized vs. a real image of self
   - Claims, shoulds
   - Defense mechanisms.

6. Harry Stack Sullivan
   - Empathy
   - Anxiety and security
PERSONALITY THEORIES-II

Course Code: PSY–407  Credit hours: 03

Course Objectives
This course aims at the developing the understanding of theories related to Psychology, of the new era. This course aims at highlighting the basic concepts of the psychologists after Freud. It will enable the students to articulate each theory, its assessment techniques and the theoretical approach to the treatment and understanding of Human. Students will be able to critically evaluate each theory

Course Contents

1. Dispositional Theories:
   a. Gordon Allport
      • Personality development
      • Personality traits
      • Critical evaluation
   b. Raymond Cattell
      • View of a person; Understanding of the person
      • Factor analysis; Economic model
      • Basic concepts; Data types; Traits; Personality of nations

Recommended books:
• Critical evaluation
• Hans Eysenck
• Basic concepts; Traits and types;
• Measuring and describing E, N, and P
• Critical evaluation

2. Humanistic And Existentialist Theories
   a. Abraham Maslow
      • Basic concepts
      • Five basic human needs
      • Self-actualizing person
      • Critical evaluation:
   b. Carl Rogers
      • Basic concepts
      • Actualization
      • Importance of self
      • Personality development
      • Client centered therapy
   c. George Kelly:
      • Basic concepts
      • Personality as a system of constructs
      • Relation among constructs
      • Personality development
      • Predictability
      • Dependency constructs
      • Role playing
      • Choices: the C-P-C cycle
      • Critical evaluation

3. Behaviorist Theories
   a. B.F. Skinner
      • Basic Concepts
      • Operant conditioning
      • Positive reinforcement
      • Negative reinforcement and punishment
      • schedules of reinforcement
      • Operant conditioning and reinforcement
      • Development of humans: Language, Personality and child rearing.
      • Critical evaluation.
   b. John Dollard and Neal E. Miller
      • Basic concepts
      • Psychopathology
      • How fear is learned
      • Effect of fear
      b. Critical evaluation

4. Social Learning Theory of Albert Bandura
3. Models of Psychopathology
   - Biological Model
The Psychodynamic Model
Behavioral Model
Cognitive Model
The Humanistic Model
The Socio-cultural Model
Eclectic Approach

4. Clinical Assessment of Abnormality:
   • A brief overview of clinical observation, tests and interviews
   • Diagnostic Classification Systems: DSM-IV and ICD-10

Recommended books:

MENTAL HEALTH AND PSYCHO-PATHOLOGY–II

Course Code: PSY–409
Credit Hours:3+1

Course objectives

The course aims to briefly define the Psychological Theories in detail. In this course, the pathology is briefly studied to build the student understanding of the abnormal behavior, its etiology, symptoms, treatment and the related factors.

Course Contents:

1. Introduction And Basic Concept Of Abnormal Behavior
2. Different Diagnosis and Etiological Factor described in DSM-IV
   Axis I, II, III, & IV
3. Disorders.
   • Anxiety Disorders
   • Somatoform Disorders
   • Dissociative Disorders
   • Schizophrenia
   • Mood Disorders
   • Eating Disorders
   • Adjustment Disorders
   • Sexual & Gender Identity
- Developmental or Childhood and Infancy Disorders
- Psychoactive Substance use Disorders
- Factitious Disorders
- Sleep Disorders
- Delirium
- Dementia
- Amnesic Disorders
- Cognitive Disorders

Recommended books:

**NEUROLOGICAL BASIS OF BEHAVIOR**

**Course Code: PSY–410**  
**Credit Hours: 03**

**Course Objectives**

The course aims at the development of student’s insight into the biological basis causing any act, or behavior or any abnormal functioning. The biological or physiological bases of associative psychological disorders are studied, in depth. This course will equip the students to understand the natural process of functioning, by studying many different methods used to explore these processes.

**Course Contents**

1. **Origins of Neuropsychology**
   - Neurological explanation of behavior
   - Historical roots of Physiological Psychology
   - Evolution of brain
   - Ethical issues in Neuropsychological research

2. **Physiology of Neural Cells**
   - Neurons
   - Types of neurons
   - Nerve impulse
   - Communication within a neuron
   - Communication between neurons.
3. **Physiology of Nervous System**
   - Basic features of nervous system
   - Central nervous system
   - Peripheral nervous system
   - Development of the brain.
   - Investigating how the brain controls behavior.

4. **Emotions and Regulations of Internal Body States**
   - Neural control of emotional response patterns
   - Role of orbit frontal cortex in social judgment and emotions
   - Neural basis of the communication of emotions

5. **Endocrine System And Emotions**

6. **Homeostasis**
   - The psychology and biology of thirst
   - The multiple controls of hunger
   - Physiological mechanisms of sleep and waking.

**Recommended books:**

---

**DEVELOPMENTAL PSYCHOLOGY**

**Course Code: PSY-411**

**Credit Hours: 03**

**Course Objectives:**

The course aims at the theoretical explanations of the developmental process. Developing the understanding of the relationship between heredity and environment as they form the foundations of human development, in cognitive, moral, and social development. These changes are occurring in late childhood, ages seven to twelve and in adolescence. The psychologist will study the normal development of child and the effect of any hindrance in the normal development.

**Course Contents**

1. **Nature and Scope**
2. **Research Methods in Developmental Psychology:**
3. **Experimental Aspects of Development:**
   Physical, Emotional, Moral, Social, Linguistic & Cognitive

4. **Phases of Development:**
   Prenatal, Birth, Infancy, Childhood, Adolescence, Adulthood, Old-age

**Recommended books:**

**CONTRIBUTION OF MUSLIM PHILOSOPHERS TO PSYCHOLOGY**

**Course Code:** PSY-412  
**Credit Hours:** 03

**Course Objectives:**
The course aims at acknowledgement of Muslim scholars, especially in the field of Psychology. This course highlights the contribution of Muslims and their in-depth study related to the Psychic phenomena, relating soul, mind, the consciousness, their way of studying those phenomena, their theories, therapies all provide a brief summary of their contribution.

**Course Contents**

1) **Introduction**
   - Definition, Subject matter and scope
   - Historical background of Muslim Psychology

2) **Studies of Muslim Scholars on Psychology**
   - Al-Kindi
   - Abn Sina
   - Ibn Rushd
   - Ghazali
   - Miskewah
   - Ashraf Ali Thanvi
   - Shah Wali Allah

3) **Methodology**
   - Quranic concept of Human Psyche
   - Concept of Man
4) Personality Theories and Therapies
   - Ghazali
   - Miskewah
   - Ashraf Ali Thanvi

5) Self Determination
   - Nafs, Laataif, Hawadas, Khawater

6) Muslim approaches to Mental Health
   - Wellbeing, love, contentment, satisfaction, hope, optimism and happiness

7) Behavior modification
   - Ibadat
   - Zakat
   - Tauba

Recommended books:
   - Rizvi, A.A. (1994) Traditions, Paradigms And Basic Concepts Of Muslim Psychology. Lahore, Pakistan: Institute Of Muslim Psychology

SPORTS PSYCHOLOGY

Course Code: PSY-413 Credit Hours: 03

Course Objectives:
This course aims at the explanation of physical health and mental health. The effects of mental health on physical and the effects of physical health upon the human being are studied. This course covers the area of Sports, the psychological well-being of the sports man, the way psychology can facilitate the sports-man and the practical implementation of the psychological theoretical concepts.

Course contents

1. Introduction to Sports Psychology
   - Historical Background of Sports Psychology
   - Theories and Models of Sports Psychology
• Methods and Measure of Sports Psychology

2. Imagery
• Development of Imager
• Neuromuscular Theories of Mental Practice
• Cognitive Theories of Mental Practice
• Bio-Informational theory of Mental Practice

3. Motivation
• Introduction to Motives and motivation theories; Self-determination Theory; Perceived Competence Theory; Achievement Goal Theory; Self-efficacy and social cognitive theory.
• Significant Other; Integrated Model of youth sport participation and withdrawal.
• Sport Commitment Model

4. Concentration
• Development: Origin of Concentration; Attention as a ‘Filter’
• Attention as a ‘Zoom lens’; Attention as a ‘resource’;
• Psychometric Approach; Effective Concentration; Mental Practice

5. Anxiety
• Introduction to Anxiety
• Drive Theory; Catastrophe Theory; Processing efficiency theory
• Conscious Processing or ‘Reinvestment’ Hypothesis;
• Physiological Measures; Self-report Instruments;
• Physical Relation Techniques;
• Simulation Training; Choking under pressure

6. Sports Exercise
• Perceptual and cognitive expertise in sports; Identifying patterns of play; Reading on opponents intentions; Visual search behavior;
• Role of Deliberate Practice in Developing; Expertise in Sport

7. Acquiring Sports Skills
• Demonstrating the Skills
• Providing verbal instructions about the skills
• Practice Scheduling; Feed Back

8. Teams
• How to define a Team;
• Individual performance in team;
• Team Dynamics;
• Teams in Content;
• Team Roles

9. The Athlete’s Career
• Gerontontology Theory;
• Thamatology Theory;
• Transition Models

10. Exercise and Mental Health
• Depression; Anxiety; Vlood State; Stress responsively
• Self Esteem;
• Body Image
• Endorphin Hypothesis; Mastery Hypothesis; Distraction or Time-out-Hypothesis; Thermogenic Hypothesis

Recommended books:

ETHICS IN PSYCHOLOGY

Course Code: PSY-414 Credit Hours: 03

Course Objectives:
The course aims at developing the students insight about the ethics of Psychology, Being a student of psychology, it is necessary to be aware of the code of conduct of the particular field.it will enable the students to know, how to behave professionally, how to practise, conduct research and how to carry out experiments

Course Contents:

1. Introduction To Ethics:
• Ethical conduct of Psychologists
• Ethical Principles of Psychologist
• Ethical Standard
• Ethical Committees; Formation of working guidelines
• Privacy and Confidentiality
• Classroom Materials
• Research Data

2. Assessment Materials

3. Psychologists And Social Responsibility

4. Ethics In Psychotherapy
• Therapists’ obligations.
• Sexually intimated behaviour with clients
• Dual relationship;
• Conflict of interest situation
• Psychologists and advertising.
• Acceptable advertisement; Unacceptable advertisement
6. Ethical Issues Involved In Experimentation With Human And Animal Subjects

7. Relationship With Colleagues;
   - Monitoring conduct of colleagues;
   - Vindictive/ difficult colleague;
   - Relationship with students/ employees

5. Ethics and Psychological research;

6. Psychologists responsibility;
   - Volunteerism;
   - Enticements
   - Concealment;
   - Distortion;
   - Deception;
   - Debriefing

Recommended books:

DETAILS OF MAJOR COURSES

PSYCHOLOGICAL TESTING-I

Course Code: PSY–431

Credit Hours: 03

Course Objectives

The subject is to introduce the student, to the basic theoretical psychometric concepts and use of psychological tests. Main course objectives include understanding of the basic principles of psychological measurement and the techniques of test construction, administration, and validation. And also to understand reliability, validity, and understanding social and cultural factors related to the assessment and evaluation of individuals, groups, and specific populations.
Course Contents

1. Psychological Assessment and tests:
   - Definition
   - Nature of Psychological assessment
   - Psychological testing
   - Types and uses
   - Control in use of psychological tests
   - Sources of information about tests
   - Ethics of psychological testing
   - Standards of testing and test administration.

2. History Of Psychological Testing:
   - Antecedents
   - Rise of modern psychological testing
   - Current status and controversies

3. Test Construction And Adaptation:
   - A general introduction
   - Characteristics of a good psychological test
   - Steps of test construction and adaptation.

4. Item Writing:
   - Types of items
   - General guidelines for writing items
   - Methods of scoring

5. Item Analysis:
   - Meaning and purpose of item analysis
   - Item difficulty
   - Item discrimination
   - Item distracters
   - Factors influencing item difficulty and item discrimination
   - Item response theory
   - Item characteristic curves.
   - Problems of item analysis: Cross Validation.
   - Item analysis of tests.

6. Reliability:
   - Introduction
   - Types of reliability
   - Measurement of reliability
   - Test-retest, split-half reliability
   - Parallel forms and inter-rater reliability
   - Cronbach alpha.
   - Factors influencing reliability of test scores
   - Improving reliability of tests.

7. Validity:
• Introduction
• Types of validity
• Face / Content, Criterion, Concurrent, Predictive and Construct validity
• Relation of validity & reliability
• Convergent & divergent validation
• Statistical methods for calculating validity
• Threats to validity

8. **Test Norms:**
• Introduction
• Types of norms
• Steps in developing norms
• Relativity of norms
• Cut-off scores.
• Implications of response sets Methods to eliminate response sets
• Interpretation of test scores

**Recommended books:**

---

**PSYCHOLOGICAL TESTING—II**

**Course Code:** PSY–432  
**Credit Hours:** 03

**Course Objectives**
Main course objectives include understanding of the basic principles of psychological measurement and the techniques of test construction, administration, and validation. Test rationale, construction, characteristics and the use of evaluation are emphasized. Understanding social and cultural factors related to the assessment and evaluation of individuals, groups, and specific populations.

**Course Contents**

1. **Assessment Of Intellectual And Cognitive Abilities**
   • Intelligence
• Nature, Meaning, Different view points
• Types of intelligence tests: Howard Gardner, Robert Sternberg, Simon-Binet, Wechsler, Kaufman.
• Differential Ability Scales
• Problems in testing intelligence during infancy, childhood, adulthood and old age.
• Cross cultural & longitudinal studies in intelligence testing.
• Diversity in test performance

2. **Tests for special populations.**
• Infant & Preschool Testing
• Testing of the Mentally Retarded populations.
• Testing for physical disabilities
• Multicultural testing.
• Adaptive Testing

3. **Computer Based Administration**
• Multilevel batteries
• Educational Testing
• Career guidance
• Aptitude testing
• Achievement testing
• Learning disabilities

4. **Personality Assessment and Testing**
• Meaning & purpose of personality assessment and testing.
• Types of Personality tests:
  • Objective and Projective tests.
  • Inventories, check lists, Autobiographical memories, rating and ranking scales
  • Interview:structured, semi structured and unstructured
• Current status of different personality assessment techniques
• When to use which test or assessment techniques

5. **Assessment of interests, values & attitudes**
• Overview & highlights
• Significant trends
• Performance.

6. **Occupational & Organizational Testing and assessment**
• Criteria for occupational testing
• Career assessment

7. **Tests applied to organizational setting**

8. **Assessment and Psychological Testing in Clinical & Counseling Settings**
• Psycho Neurological tests
• Behavioral assessment and clinical judgment
• Battery of diagnostic tests
• Evaluation of various assessment techniques

Recommended books:
(for Psychological Testing I and II)

RESEARCH METHODOLOGY-I

Course Code: Psy–433  Credit Hours: 03

Course Objectives
This course will examine a number of major research topics in social psychology. Students are expected to gain substantial knowledge of the field, including major concepts, theories, empirical findings, and controversies. Also, students will also have the opportunity to communicate critically and creatively about these theories and findings.

Course Contents:

1. Introduction
   - Scientific and non-scientific approaches to knowledge.
   - The scientific method: definition, features, goals, and steps.
2. Identifying a research problem
   - Basic approaches
   - Sources of research literature
3. Scientific theories and hypotheses
   - Formulation of a hypothesis
   - Criteria of a hypothesis
   - The nature and types of hypotheses
   - Operational definitions
4. Ethical issues in the conduct of psychological research: APA ethical standards
   - Risk versus benefit
   - Anonymity and privacy of the subjects
   - Informed consent
   - Research with animals
   - Qualitative Techniques
5. **Descriptive research methods**

A. **Observation**
   - Naturalistic observation \ observation without intervention
   - Observation with intervention
   - Participant observation
   - Structured observation
   - Field experiments

b. **Recording behavior**
   - Qualitative measures of behavior
   - Quantitative measures of behavior

c. **Analysis of observational data:**
   - Advantages,
   - Problems
   - methodological issues

d. **Unobtrusive measures of behavior**
   - Physical traces
   - Archival data

6. **Sampling techniques**

   - Basic terminology ; representativeness and bias Probability sampling
   - Random sampling methods: pure\ simple random sampling; Random digit dialing, Systematic\ interval sampling
   - Stratified random sampling
   - Cluster sampling; simple and multistage
   - Non-probability sampling: Accidental\Incidental\grab; Purposive; quota; Self-Selected; Snowball; Convenience; Clinical Sampling
   - Time and event sampling
   - Situation sampling

**Recommended books:**

RESEARCH METHODOLOGY-II

Course Code: PSY-434 Credit Hours: 03

Course Objectives
The course will help in briefly explain the social research, providing a brief description of various methods of research.

Course Contents:

1. Correlational Research:
   - The nature and logic of correlations
   - Correlation versus causality
   - Measures in correlational research
   - Interviews and questionnaires
   - Margin of error
   - Reliability and validity
   - Predictions and decisions

2. Surveys:
   - Nature, goals, and, basic steps
   - Survey methods: mail surveys, personal interviews, telephone surveys

3. Survey Research Designs
   - Cross-sectional design
   - Successive independent samples design
   - Longitudinal design

4. Experimental Research Methods
   - Experimental method: Control and variability, logic, characteristics Independent measure designs/Between group design Random group design
   - Alternative independent groups design
   - Methodological issues: Individual differences; Assigning conditions
   - Repeated Measures designs/Within group design
   - Advantages and methodological issues: Differential carry-over effect, and general practice effect
   - Complex designs
   - Small N designs
   - Classical, After – only, Before – after no control group, Crossover, Solomon four-group, and Factorial designs
5. **Applied Research**
   - Single Case research designs
   - Quasi-Experimental Designs
   - Retrospective \ Ex Post Facto Designs
   - Prospective Quasi – Experimental Designs
   - Time Series Designs
   - Event – Specific Alignment Designs
   - Twin Studies and Adoption Studies
   - Reporting Investigations

6. **The structure of a research report based upon APA standards**: Title page, abstract, introduction, review of relevant literature, method, results, discussion, references and citations

7. **Research Project**
   - The students will be expected to carry out small research projects either individually or in groups (preferably 2 students per group), and submit formal research reports. The final evaluation will be on the basis of the report as well as individual viva voce. APA protocol of report writing will be required.

**Recommended books:**

---

**ENVIRONMENTAL PSYCHOLOGY**

**Course Code: PSY-435**
**Credit Hours: 03**

**Course Objectives:**
To enable the students to learn the psychological effects, of the environment on humans and humans’ effects on environment. The main course aim is to embark upon the student the importance of the environment, and its impact upon the human nature.

**COURSE CONTENTS:**

1. **Introduction to Environmental Psychology:**
• Importance and Application of Subject in Daily Life

2. Components of the Environment
   • Environmental Men : Evaluation and Anthropology

3. Environment:
   • Historical Attitudes toward the Natural Environment
   • Environment Perception and the Use of Natural Environment
   • Social Interaction and the Environment.
   • Impact of Environment on Personality Development and Individual Differences
   • Mob and Group Behavior in Environmental and Cultural Variances
   • Environmental Changes and Stress .

4. Impact of Environment in its Incumbents
   • The City as an Unnatural Habitat
   • Nature and Environment Changes in Rural and Urban Areas

5. Environment and Adjustment :
   • Gender, Age Job Family, Fashion, Religion Society.
   • Catastrophes and Human Adjustment to Meet the Future Challenges like Changes in Industrial and Geographical Development
   • The Built Environment and Human Adjustment

6. Further Plans, Cities and Global Interaction in Reference to Entranced Issues

Recommended books:

ADVANCED SOCIAL PSYCHOLOGY

Course Code: PSY:436 Credit Hours: 03

Course Objectives

This course will examine a number of major research topics in Social Psychology. Students are expected to gain substantial knowledge of the field, including major concepts, theories, empirical findings, and controversies. Also, students will also have the opportunity to communicate critically and creatively about these theories and findings.

Course Contents
1. **Introduction**  
   - Introduction to Advance Social Psychology  
   - Definition, scope, subject matter and nature of Advance Social Psychology

2. **Theories of Social Psychology Theorists**  
   - Sigmund Freud  
   - C.H. Cooley  
   - B. F. Skinner  
   - D H Mead

3. **Basic Concepts in Social Psychology**  
   - Stereotypes  
   - Prejudice and Discrimination

4. **Interacting with others**  
   - Interpersonal Attraction – need  
   - Characteristics of other situation and problems  
   - Intimacy — Parent-child.  
   - Interpersonal violence.

5. **Group Influence**  
   - Nature and functions  
   - How groups affects individual performance  
   - Facilitation  
   - Social loafing  
   - Coordination in groups  
   - Cooperation or conflict  
   - Perceived fairness in groups  
   - Decision making by groups:  
     - Process  
     - Potential dangers.

6. **Leadership**  
   - History of leadership  
   - Types and leadership styles  
   - Effective leadership process  
   - Core activities of a leader  
   - Leadership Training  
   - Leadership & Gender.

7. **Role of Media in Social Psychology**  
   - Perception, Persuasion  
   - Propaganda
8. **Social Psychology in action**
   - Applying social psychology to:
     - Interpersonal aspects of the legal system
     - Health related behavior
     - World of work

**Recommended books:**

---

**POSITIVE PSYCHOLOGY**

**Course Code:** PSY–437  
**Credit Hours:** 03

**Course Objectives**

The proposed course aims at enriching the students regarding positive aspect of human nature. It also covers subjective state of well-being, optimism and emotional intelligence that facilitates the development of human resource in any society.

**Course Contents**

1. **Introduction,**
   - Nature
   - Scope of Positive Psychology
   - Approaches/Perspectives on Positive Psychology

2. **Personal Traits**
   - Positive traits and Negative traits

3. **Nature and Associated Psychological Factors:**
   - Hope; Optimism; Happinesse; Love; Empathy; Attachment; Emotional Intelligence; Tolerance; Forgiveness; Gratitude; Faith; Morality; Wisdom and Creativity; Resilience; Spirituality; Altruism

4. **Self Determination Theory and Intrinsic Motivation**

5. **Social Development and Well Being**

**Recommended books:**

EDUCATIONAL PSYCHOLOGY

Course Code: PSY–438  Credit Hours: 03

Course Objectives

The students will be able to apply learning theories to classroom situations. Examine the importance of the psychology of the individual to the development of self-esteem, cooperative learning, individual differences, and motivation and learning styles. It describes the relationships of teachers, parents, and students that lead to a productive learning environment. Articulate their own beliefs about education and the role of educational psychology.

Course Contents

1. Introduction:
   • Definition of Educational Psychology, Nature and Scope
2. Individual Differences:
   • Intelligence, Cognitive styles
3. Learner's Characteristics:
   • Abilities, Motivation, Interest, Aptitude
4. Learning theories and practical applications
   • behavioral, cognitive and constructivist approaches
5. Characteristics of a Good Teacher
6. Counseling and Vocational Guidance
7. Behavior Modification
8. Designs of Evaluation
9. Psychology of teaching (constructivism)
10. Special Education:
11. Segregated education; integrated education; inclusive education
12. Class Room Management:
13. Managing the Class Room Methods of Control

Recommended books:

CROSS CULTURAL PSYCHOLOGY

Course Code: PSY–439
Credit Hours: 03

Course Objectives

The course should result in the students' higher awareness of the balance between the social and biological substrates of human behavior. Students should learn the difference between area studies, cross-cultural studies, and intercultural studies. Students will learn the basics of successful cross-cultural research and be competent to conduct a valid study of behavior in the cross-cultural context.

Course Contents

1. History of Cross Cultural Psychology
   • Methodological issues of cross cultural psychology Comparability and Equivalence
   • Emic and Etic Approaches
   • Sampling Strategy in Cross Cultural Research
   • Problems of translation, adaptation and application of psychological tests across cultures

2. Culture and Basic Psychological Processes
   • Culture and Cognition
   • Culture and Emotion, Cultural Similarities and Dissimilarities, Cultural Shock
   • Cross Cultural Studies on Perception and Cognitive Styles
   • Cross Cultural Research on Motivation
   • Socialization across cultures:
   • Individualism & Collectivism
   • Sex-trait stereotypes
   • Development of Gender-stereotypes
   • Parental acceptance – Rejection Theory (PART)
   • Cross Cultural Testing of PART
   • Worldwide application of Piaget cognitive theory
   • New Trends in Cross Cultural Research
   • Indigenous Psychology across Cultures
Recommended books:

COGNITIVE PSYCHOLOGY

Course Code: PSY–440  Credit Hours: 03

Course Objectives

The course helps to understand the contributions made to the understanding of human thought processes by cognitive psychologists. The course aims at becoming familiar with the basic subjects of cognitive study including perception, attention, consciousness, memory, imagery, comprehension, categorization, problem-solving and language. And to develop a view of human cognition that is grounded in research and based on an integration of the student's faith with what psychologists have observed. It will help to develop each student's skills in analytical and synthetic thinking, research methods.

Course Contents

1. Introduction
   - Historical Perspective
   - Cognitive neuroscience
   - The eye and Visual cortex; Perception of movement and form
   - The ear and auditory cortex; Magnocellular and parvocellular pathways
   - Memory scanning. Mental processing revealed by reaction time experiments.
   - Types of perception; Colour perception, Depth Perception, movement perception, perception of time.

2. Visual & Auditory Perception
   - Sensory memory: iconic memory & Echoic memory
   - Pattern Recognition
   - Selective adaptation of linguistic feature detectors
3. **Visual Imagery**
   - Visual images preserve metric spatial information. Reinterpreting visual patterns
   - Neural Basis of mental imagery. Size-distance paradox.
   - Mental rotation.

4. **Attention & Short Term Memory**
   - Magic number 7, chunking
   - Studies of interference in serial verbal reactions Attention and cognitive control.
   - Selection for actions and the inhibitory mechanisms Visual Perception.
   - Masking.

5. **Learning & Long Term Memory**
   - Retention in episodic memory
   - Semantic integration of verbal information into a visual memory Working Memory and long term memory
   - Creating false memories
   - Fan effect
   - Levels of processing
   - Practice effects
   - Mnemonic devices
   - Recall vs recognition
   - Implications for studying and examination: the SQ3R’s

6. **Thinking and Problem Solving o Categorization**
   - Basic Objects in natural categories
   - Concepts and conceptual structure Modus Tollens
   - Cognitive biases & gambler’s fallacy
   - Heuristics and algorithms

7. **Psycholinguistics**
   - Chomsky’s contribution
   - Language comprehension Reading: Parsing
   - Linguistics Determinism: Whorf-Sapir hypothesis

8. **Cognitive Development**
   - Piaget’s contribution
   - Social and Emotional development Moral Development
   - Gender differences in development
   - Development of Language in genie Child’s learning of morphology
   - Rule learning by 7-month old infants
   - Bilingual development: child-adult differences.

**Recommended books:**
INDUSTRIAL PSYCHOLOGY

Course Code: PSY:442  
Credit Hours: 03

Course Objectives:
This course contributes to the following competence areas of reasoning and arguing about psychological theory, practice and policy based on solid arguments. It deals with a multitude of theoretical models or research approaches relevant to Industry, the effects of Industry on human beings and the effects of human upon the out-put of an industry. To situate the relevance of psychological theory, practice and policy in society

1. Course Contents
   The Practice Of Industrial Psychology
   - Principles, practices and problems
   - Methods and techniques

2. Personnel management
   - Recruitment and selection
   - Psychological testing
   - Performance appraisal
   - Training and development

3. Organizational psychology
   - Leadership
   - Motivation, job satisfaction and job involvement
   - The Organization of the organization

4. Work Psychology
   - Working conditions
   - Safety, violence, and health in the workplace
   - Stress

5. Consumer psychology
   Industrial psychological analysis of consumer behavior

Recommended books:
ADVANCE STATISTICS

Course Code: PSY-442  
Credit Hours: 03

Course Objectives:
The course aims at the explaining and understanding various methods of statistics that can be used in social research.

Course Contents:

1. Analysis of Variance  
2. Analysis of Covariance  
3. Multivariate Analysis of Variance  
4. Variate, Bivariate, Multiple Variate  
5. F-Test, G-Test & T-Test  
6. Simple Regression Analysis  
7. Multiple Regression Analysis  
8. Factor Analysis  
9. Discriminate Analysis  
10. The Analysis of Contingency Tables  
11. SAS  
12. MINITAB  
13. SPSS

Recommended books:
RESEARCH PROJECT & THESIS

Course Code: PSY-443  
Credit Hours: 06

Course Objectives:
The students will be expected to carry out small research projects either individually or in groups (preferably 2 students per group), and submit formal research reports. The final evaluation will be on the basis of the report as well as individual viva voce. APA protocol of report writing will be required.

Recommended books:

DETAILS OF ELECTIVE COURSES

Each Institution may add and opt any four Elective Courses of each course of three credit hours (12 credit hours)

CLINICAL PSYCHOLOGY

Course Code: PSY-451  
Credit Hours: 03

Course Objectives:
The course aims at the development of student’s insight into the practice of the psychological theories and therapies. The various therapies are studied for the better understanding of the people in distress.

Course Contents:

1. **History of Clinical Psychology**
2. **Definition, Scope and present status**
3. **Training of Clinical Psychology**
   - Training of clinical Psychology
   - Differentiate between psychiatrist and psychologist
   - Interview, Testing, intervention, projective tests.
   - Neuro Psychological tests
4. **Psychological Assessment**
5. **Psycho Therapies for different disorders**
   - Psychology Analytical Therapy
   - Client – Centered Therapy
   - Behavior Therapy
   - Group Therapy
   - Rational Emotive Behavior Therapy.
   - Gestalt Therapy
   - Family Therapy.
6. **Rehabilitation**

Recommended books:
Course Objectives:
The course aims to highlight the basic principles of counseling and techniques used in the process of counseling.

Course Contents:

1. The Counseling Profession: A Historical Perspective
   - The development of counseling as a distinct profession in Pakistan
   - Historical and Social factors
   - Frank Parsons and other early influences
   - Beginnings of professional organizations and professional identity;
   - Influence of World War-I & II
   - Government involvement; Current Trends and future directions.

2. The Criteria of Mental Health
   - The Concept of Adaptive and Maladaptive Behaviour;
   - Healthy personality with particular reference to Jahoda (1958),

3. Client Centered And Behavioristic Counseling Approach

4. The Counseling Interview
   - Introduction.
   - Kinds of Interviews
   - The Intake Interview
   - The Diagnostic Interview
   - Interviewing with significant others
   - The Case History Interview and some other major types
   - Interview techniques in Counseling
   - Structuring the counseling relationship
   - Relationship Techniques

5. The Process of Counseling
   - Nature & Importance of professional relationship;
   - Ingredients of helping relationship,

6. Characteristics of Effective Counselors: A client’s rights

7. Tests in Counseling
   - Introduction,
   - Limitations of the Use of Psychological Tests
   - Types of Psychological Tests
   - Factors affecting psychological test results
   - Test Use in Counseling Situations
   - Test Interpretation in Counseling

Recommended books:

COUNSELING IN SPECIFIC FIELDS

Course Code: PSY-453                     Credit Hours: 03

Course Objectives:
The course will enable the students to practice their counseling skills in mental health, schools, day to day interaction and to provide an understanding about the current trends in the field of counseling.

Course Contents:

1. Mental health counseling
   • Criteria of mental health counselors:
   • Theories and function of mental health counseling;
   • Counseling in the community
   • Current trends in mental health work setting

2. School counseling
   • Definition of school counseling
   • Qualification of school counselors
   • Perspectives of a school counselor
   • Principle of comprehensive school counseling programs
   • Types of program interventions
   • Developmental school counseling and its implementation in the schools.

3. Counseling over the life span
   • Child counseling
   • Basic trust vs. Basic mistrust, autonomy vs. Shame and doubt, initiative vs. Guilt, industry vs. Inferiority; counseling strategies for children.

4. Counseling with adolescents:
   • Views of adolescent
   • The development of intimate relationships
   • Physical attractiveness and its social meaning
- The signs of adolescence love, sex and adolescent
- Adolescent abuse of alcohol. Counselor’s role.

5. **Adult counseling**
- Demography of aging
- Problems and concerns of the old age people
- loss of work role identity, decreased financial support; loss of significant persons and increased loneliness; increased physiological disorders and dependence
- Counselor’s role

**Recommended books:**

**ASSESSMENT AND DIAGNOSIS IN COUNSELING**

**Course Code:** PSY-454  
**Credit Hours:** 03

**Course Objectives:**
The course is designed to illuminate the process of counseling in order to equip the students with the basic skills of assessment and diagnosis. In addition, the basic principles for assessment and diagnosis are also emphasized.

**Course Contents:**

1. **The Nature and Importance of Psychological Assessment**
   - The DSM IV and other Diagnostic Systems (e.g. ICD-10)
   - Review of DSM IV and ICD-10

2. **Principles of Formal Assessment:**
   - Introduction to Quantitative aspects of Psychological Assessment
   - Single Case Study
   - Neurological Tests

3. **Projective Tests and Personality Test:**
   - Interviewing Methodology;
   - Questionnaires Methodology;
   - Raven’s Progressive Matrices
   - Good enough Harris Drawing Test
   - Portage Guide to Early Education.
   - Bender Gestalt Test.
   - Children Apperception Test
   - Thematic Apperception Test
   - Rotter’s Incomplete Sentence Blank.
• Beck Depression Inventory
• Various methods of Personality Assessment:
  • Projective RISB
  • T.A.T. (Thematic Apperception Test)

4. **Non-Projective techniques**
   • MMPI
   • 16 PF

5. **Intelligence:**
   • Definition and theories
   • Tests of Intelligence and Scholastic Abilities.
   • Wechsler Adult Intelligence Scale

6. **Aptitude:**
   • Aptitude and achievement tests.

7. **The use of Psychological tests in Pakistan with Clinical Samples**

8. **Social and Ethical Issues in implementation of Psychological Testing with special reference to Pakistan**

**Recommended books:**

**FORENSIC PSYCHOLOGY**

**Course Code:** PSY-455  
**Credit Hours:** 03

60
Course Objectives:
The course primarily aims to inculcate the basic knowledge about law, legal human rights and assessment of the psychological principles in accordance to the mentioned issues.

COURSE CONTENTS:

1. Introduction to Forensic Psychology
   - History of Forensic Psychology; Defining Forensic Psychology;
   - Legal Research for the social scientist

2. Applying Psychology to Civil Proceedings
   - Understanding Adult Domestic Law Issues; Understanding Child
   - Domestic Law Issues; Conducting Personal Injury Evolution;
   - Personality Assessment in Personal Injury Litigation

3. Applying Psychology to Criminal Proceedings
   - Evaluating eyewitness testimony in Adults & children;
   - Competency to stand Trial; Insanity Defense; Specific intent and
   - Diminished capacity; Probation and Parole

4. Special Applications
   - Violence Risk Assessment; Psychology and Law Enforcement;
   - Polygraph Testing

5. Communicating Expert Opinions
   - Writing Forensic Report; Serving as an expert witness

6. Interviewing with Offenders
   - Punishments and alternate routes to crime prevention; Practicing
   - psychology in Correctional settings; Psychotherapy with criminal
   - offenders

7. Professional Issues
   - Practicing Principled Forensic Psychology; legal, ethical and
   - moral consideration; Training in Forensic Psychology

Recommended books:

GENDER STUDIES IN PSYCHOLOGY

Course code: PSY-456
Credit Hours: 03

Course Objectives:
The concepts about gender relations will be learnt. The historical movements and feminist perspectives about gender relations will be explored. The course will provide understanding about globalization and its role towards changing gender relation in various societies around the world. Special emphasis shall be given to Muslim and Pakistani societies. Specific areas of gender discrimination (both for men and women) will also be learnt.

Course Contents;

1. **Introduction**
   - Definition, Concepts and Importance
   - Gender Studies in International Setting
   - Gender Studies in Pakistani Perspective
   - Feminism

2. **Major Feminist Perspectives**
   - Liberal Feminism
   - Radical Feminism
   - Marxist Feminism
   - Theological Feminism

3. **Gender and Human Rights**
   - Definition and Nature of Human Rights
   - Collective Rights
   - Ethnic Minority Rights
   - Fundamental Rights
   - Property Rights

4. **Gender and Politics**
   - Gender and Third World Politics
   - Women Political Leaders, Past and Present
   - Women in the Legislatures and Executive of the Law
   - Power and Patriarchy
   - Women in Pakistani Political Setup
   - Women Participation in Local Government System

5. **Gender and Education**
   - Gender and education
   - Gender, Origin and development of education
   - Gender Education and religion
   - Gender Education and polity
   - Gender Education and economy
   - Gender Education and social mobility
   - Gender and Forms of education

6. **Gender and Population**
   - Population composition
   - Sex Composition
   - Gender Roles and Family Size
   - Gender and Reproductive Role
7. Gender and Development

- Gender Roles
- Access to Resources
- Gender Disparity
- Problems of Gender Development
- The role of Development Aid in Gender development
- The role of non-government organizations in Gender development
- Journey from WID to GAD

Recommended books:
- Butler, J (2004), Undoing Gender, Routledge.
- Jane, P. (2008) 50 Key Concepts In Gender Studies, Sage Publication New Delhi, India

PSYCHOPHARMACOLOGY

Course Code- PSY-457 Credit Hours: 03

Course Objectives;
The course is designed to equip the students with the knowledge related to psychiatric medicines and its importance.

Course Contents

1. Assessment of diagnosis as conducted by neurologists
2. When to make a referral to a neurologist, or psychiatrist
3. How to understand consultants
4. Treatment and Rehabilitation Techniques
5. Different Prescribed Drugs-in Psychological Illnesses
6. Effects and Side Effects of Drugs
7. Endocrine System
8. Role of Neurotransmitters and Neuromodulators
9. Neurological Disorders:
   - Organic Brain Syndrome
   - Affective Disorders
   - Epilepsy
   - Neurological Explanation of Schizophrenia
   - Anxiety Disorders
   - Sleep Disorders
   - Degenerative Disorders.

Recommended books:
- Hacker-M., & Messer, S-W. Pharmacology: Principles And Practice. New Jersey, USA: Prentice Hall Publisher

DEVELOPMENT OF RESEARCH PROPOSAL

Course Code: PSY-458  Credit Hours: 03

Course Objectives:
The course will enable the students about the mechanism, technique and methodology of writing a standardized research proposal for their future research.

Course Contents:
- Report Writing and Programme Evaluation
- Writing of a Research Proposal

DRUGS DEPENDENCE AND ADDICTION

Course Code: Psy-459  Credit Hours: 03

Course Objectives:
The course provides an introduction of addiction, including the history of drug use, demographic correlates of addiction, addiction's time course, and characteristics of drug using populations, basic drug pharmacology, and treatment strategies.

Course Contents:
1. Introduction to Addiction:
   - Introduction to Drugs,
   - Psychology of Drugs,
   - Understanding Addictive Processes

2. Physiology and Pharmacology of Drugs:
   - kinds of Drugs,
   - Detoxification:
   - Identification of Need and Therapeutic Interventions,
   - Basic Pharmacology,
   - Drugs and the Brain

3. Law and Ethics:
   - Law and Ethics related to Addiction.
   - Basic Ethics for Addiction Professionals,
   - Diagnosing Substance Abuse and Dependence: Using the DSM Structure.

4. Case Management:
   - Assessment of Drug Addiction,
   - Orientation towards Treatment,
   - Treatment Planning and Relapse Prevention/Aftercare Planning.
   - Creating Motivation for Change in Substance Abuse Treatment,
   - introduction to Co-occurring Disorders of Addiction

5. Professional Practice in Addiction Counseling:
   - Basic Counseling Information,
   - Guidelines and Techniques,
   - Individual, Group and Family Counseling.

Recommended books:

PSYCHOLOGY OF CRIMINAL BEHAVIOR

Course Code: PSY-460  Credit Hours: 03

Course Objectives:
This course will examine the Psychology of Criminal Behavior using several different theoretical orientations, examining different Theories of Criminal Behavior, analysis of the criminal mind through the relationship between mental illness, criminal acts, and the Psychopathology

Course Contents:
1. Crime
   • What is crime, different types of crimes?
2. Theories of criminal behavior:
   • Introduction to the Biological, Sociological and Psychological Theories of Aggression & Violence
3. Mental illness:
   • Brief explanation of Crime and Mental Illness, Competency and Criminal Responsibility.
4. Psychopathology of criminal behavior:
   • The association between Crime and Mental Illness
5. Homicide, serial & mass murder & sexual predators & infanticide:
